Professional Summary

Computer Science graduate with hands-on experience in Python, Java, SQL, Machine Learning, Data Science, and full-stack development. Experienced in building AI-powered and web applications using Python, Flask, and MySQL. Strong problem-solving skills with a keen interest in AI/ML, Data Science, and software development. Passionate about learning new technologies, building intelligent solutions, and continuously improving technical expertise.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering 2020 – 2024
Koneru Lakshmaiah University, Vijayawada CGPA: 8.51/10

Technical Skills

Programming Languages: Python, Java, JavaScript, SQL

AI & Machine Learning: Machine Learning, Deep Learning, Natural Language Processing (NLP), Generative AI

Data Science & Analytics: Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis, Model Evaluation

AI/ML Tools & Frameworks: Scikit-learn, TensorFlow, PyTorch, Hugging Face Transformers

Data Science Libraries: NumPy, Pandas

Data Visualization: Matplotlib, Seaborn

Web Development: HTML5, CSS3, JavaScript, React.js, Bootstrap, Flask, REST APIs

Databases: MySQL, MongoDB

Cloud & Deployment: AWS

Tools: Git, GitHub, Visual Studio Code, Jupyter Notebook, Google Colab

Internship Experience

Python Full Stack Intern – Codegnan IT Solutions

- Developed full-stack web applications using Python, Flask, MySQL, HTML, CSS, and JavaScript .
- Designed and integrated REST APIs for backend communication and application functionality.
- Optimized backend logic and database queries, improving application performance.
- Worked on database operations, application testing, debugging, and feature development.
- Used Git and GitHub for version control and collaborated in an Agile development environment.

AWS AI-ML Intern – AWS Academy

- Developed and deployed machine learning solutions using AWS services including Amazon S3, Amazon EC2, and AWS Lambda.
- Worked with data-processing workflows and cloud-based AI/ML applications.
- Built automated data-processing workflows that improved data-processing efficiency.
- Applied machine learning and cloud deployment concepts to practical AI/ML use cases.

Projects

Image Captioning – Deep Learning & NLP Application

🌐 imagecaption

Technologies: Python, TensorFlow, Hugging Face, Streamlit, NLP, Deep Learning

- Developed an AI-powered image captioning application using deep learning and transformer-based NLP models.
- Integrated Hugging Face models to generate natural-language captions from uploaded images.
- Implemented image preprocessing and model inference workflows for image-to-text generation.
- Built an interactive Streamlit application for real-time image caption generation.

Quick Notes – Python Full-Stack Web Application

🌐 quicknotes

Technologies: Python, Flask, MySQL, HTML5, CSS3, JavaScript, REST APIs, AWS EC2, Git, GitHub

- Developed a secure full-stack note management application with user authentication and CRUD functionality.
- Designed and integrated RESTful APIs with MySQL for structured data storage and retrieval.
- Implemented responsive web interfaces using HTML, CSS, and JavaScript.
- Optimized database queries and backend logic and deployed the application on AWS EC2.

Certifications

- AWS Certified Cloud Practitioner
- Red Hat Certified Enterprise Application Developer
- Oracle Cloud Infrastructure Foundations Associate
